18
MONTHS OF EACL
a growing community

AN OPENING MESSAGE FROM THE PRESIDENT

WELCOMING ADDRESS

The European Association of Climate Law is a young organisation and already a community of more than 100 climate law scholars and practitioners.

The EACL was founded in Berlin on 28 March 2025 with the ambition of creating a European platform for the exchange, development, and advancement of climate law. In the eighteen months since, it has grown from a small founding initiative into a European network of more than 100 climate law scholars and practitioners.

Those months were largely devoted to building foundations, and there is already a good deal to show for them. The first Early Career Researcher Award has been presented. The first newsletters have appeared, alongside the first contributions to the newly launched EACL Climate Law Blog. Thematic working groups are being established, and arrangements are under way for the open-access publication of our annual conference proceedings in the Carbon & Climate Law Review (CCLR). The Association has co-hosted events in Graz and Cambridge, through a number of collaborations, and is preparing its presence at COP31 in Türkiye.

For an academic association, however, nothing matters more than coming together in person. The founding conference in Berlin drew far more interest, both in European climate law and in the EACL itself, than we had expected. That so many scholars would meet across different topics, methodologies and career stages, from students to senior professors and members of European and United Nations bodies, was by no means a given; nor was there any guarantee that the conference would prove to be more than a single occasion to discuss the law. A year on, the interest is here to stay. We are even more grateful that this year's hosts, the University of Eastern Finland (UEF) and its Centre for Climate Change, Energy and Environmental Law (CCEEL), were committed from the outset to sustaining that spirit. It is thanks to their work that we were able to explore the theme "Climate Law 10 Years after the Paris Agreement" together. Preparations for the 2027 annual conference are already well advanced, and planning for the 2028 conference has even begun!

My heartfelt thanks go to everyone who has contributed to these successes, whether as founders, board members, conference organizers or speakers, or through many other forms of support.

This first annual report sets out the development of EACL and its activities in detail; more can be found on our website. I hope you enjoy reading it, and I would warmly welcome your active involvement in the Association.

Michael Rodi

President, European Association of Climate Law

Helsinki, September 2026

01 / WHO WE ARE

Purpose, history and founding

A European platform for the exchange, development, and advancement of climate law.

Objectives of the Association

The European Association of Climate Law (EACL) is a non-profit organisation dedicated to advancing the study of climate change and law in Europe and beyond. By providing a platform for in-depth discussion, fostering collaboration among legal experts and supporting the participation of young scholars, EACL seeks to strengthen legal responses to climate change from global to local levels.

Origins and the Founding Committee

The initiative to establish a Europe-wide association dedicated to climate law originated at the Institute for Climate Protection, Energy and Mobility (IKEM) in Berlin. To take the idea forward, a Founding Committee was convened, composed of Prof. Harro van Asselt (University of Cambridge), Prof. Jelena Bäumler (Leuphana University Lüneburg), Dr. Michael Kalis (Leuphana University Lüneburg and IKEM), Dr. Ievgeniia Kopytsia (Yaroslav Mudryi National Law University, Kharkiv), Prof. Michael Mehling (MIT) and Prof. Michael Rodi (University of Greifswald and IKEM).

From autumn 2024, the Founding Committee met several times, focusing its deliberations on three main questions:

- the name of the association, European Association of Climate Law, with the acronym EACL, while European Society of Climate Law was considered as an alternative;
- the membership structure, with individual members prioritised, and the admission procedure;
- the governing bodies of the EACL.

The outcome of this work is the EACL Statutes in their current form, which are available on the Association's website (eacl.eu).

01 / HISTORY AND FOUNDING

The Founding Assembly

On 28 March 2025, the Association moved from an initiative to a formally constituted organisation.

Seven founding members

Seven founding members took part in the Founding Assembly: Prof. Jelena Bäumler (Leuphana University Lüneburg), Matthias Hartwig (IKEM), Dr. Michael Kalis (Leuphana University Lüneburg and IKEM), Dr. Ievgeniia Kopytsia (Yaroslav Mudryi National Law University, Kharkiv, and IKEM), Dr. Aleksandra Novikova (Avangarde Group and IKEM), Prof. Michael Rodi (University of Greifswald and IKEM) and Prof. Johanna Wolf (University of Osnabrück).

The Assembly discussed the draft Statutes submitted by the Founding Committee and adopted them with a number of amendments.

The Founding Board

The Assembly also elected a Founding Board, consisting of Prof. Michael Rodi (University of Greifswald and IKEM) as President, and Prof. Jelena Bäumler (Leuphana University Lüneburg) and Dr. Ievgeniia Kopytsia (Yaroslav Mudryi National Law University, Kharkiv, and IKEM) as Vice-Presidents.

Work of the Founding Board

The Founding Board deliberately confined its decisions to matters required under German association law, in particular the registration of the EACL as a legal entity in the Register of Associations (*Vereinsregister*). The registration was completed in September 2025.

01 / HISTORY AND FOUNDING

The first General Assembly

The first regular General Assembly took place in Berlin on 22 September 2025, during the inaugural EACL Annual Conference.

Figure 1: Ready, set, go! The newly elected EACL board at the Berlin conference 2025, left to right: Michael Rodi, Ievgeniia Kopytsia, Jelena Bäumler, Christina Voigt, Harro van Asselt, Michael Kalis, Michael Mehling (missing: Mirjana Drenovak-Ivanovic, Lucila de Almeida, Francesco Sindico), Source: @IKEM

During the General Assembly, the Founding Board stepped down, and a new Executive Board was elected.

Since then, the Executive Board has consisted of:

Prof. Harro van Asselt (University of Cambridge), Prof. Jelena Bäumler (Leuphana University Lüneburg), Prof. Lucila de Almeida (European University Institute; NOVA University Lisbon), Prof. Mirjana Drenovak-Ivanović (University of Belgrade), Dr. Michael Kalis (University of Greifswald and IKEM), Dr. Ievgeniia Kopytsia (Yaroslav Mudryi National Law University), Prof. Kati Kulovesi (University of Eastern Finland), Prof. Michael Mehling (MIT Center for Energy and Environmental Policy Research), Prof. Michael Rodi (University of Greifswald and IKEM), Prof. Francesco Sindico (University of Strathclyde; IUCN World Commission on Environmental Law), Prof. Christina Voigt (University of Oslo).

02 / BOARD AND GOVERNANCE

Introducing the Board

Eleven climate-law scholars connecting expertise across Europe and beyond.

Michael Rodi

PRESIDENT

University of Greifswald / IKEM

Founder and scientific director of IKEM and formerly Professor at the University of Greifswald. His expertise spans climate law, sustainable energy and transport, and the legal design of taxes and subsidies for the transition.

Harro van Asselt

VICE-PRESIDENT

University of Cambridge

Hatton Professor of Climate Law at Cambridge and a Law Fellow at Hughes Hall. His research covers international, European and national climate law and governance.

Kati Kulovesi

VICE-PRESIDENT

University of Eastern Finland

Professor at the University of Eastern Finland specialising in international, EU and comparative climate law, international economic law and legal theory. She combines legal scholarship with interdisciplinary climate research and extensive policy advisory experience.

Christina Voigt

EXECUTIVE BOARD

University of Oslo

Professor of Law at the University of Oslo and Chair of the IUCN World Commission on Environmental Law. A former Norwegian climate negotiator, she helped negotiate the Paris Agreement and co-chairs its compliance committee.

Francesco Sindico

EXECUTIVE BOARD

University of Strathclyde / IUCN World Commission on Environmental Law

Professor of International Environmental Law at the University of Strathclyde, Director of the Climate Change Legal Initiative, and Co-Chair of the Climate Change Specialist Group of the IUCN World Commission on Environmental Law. His work connects climate law with islands, water, nature and renewable energy.

Ievgeniia Kopytsia

EXECUTIVE BOARD / ECR REPRESENTATIVE

Yaroslav Mudryi National Law University / IKEM

Associate Professor of Environmental Law at Yaroslav Mudryi National Law University. Her research spans Ukrainian, European and international environmental, climate and energy law, with particular attention to climate governance, climate security and the legal foundations of Ukraine's green and resilient recovery.

02 / BOARD AND GOVERNANCE

Introducing the Board

Jelena Bäumler

EXECUTIVE BOARD

Leuphana University Lueneburg

Professor of Public and International Law with a focus on sustainability. Her research links international economic law, environmental and climate law, and human rights; she also advises states in proceedings before international courts and tribunals.

Lucila de Almeida

EXECUTIVE BOARD

EUI / NOVA University Lisbon

Professor at the European University Institute's Florence School of Regulation and NOVA School of Law. Her work focuses on energy and climate law, including markets, contracts, consumer protection, market integrity and ESG impact.

Michael Kalis

EXECUTIVE BOARD / ECR REPRESENTATIVE

University of Greifswald / IKEM

Deputy Scientific Director at IKEM and senior researcher at the University of Greifswald. He works on climate and energy-transition law, climate justice, constitutional climate protection, sector coupling, synthetic fuels and hydrogen regulation.

Michael Mehling

EXECUTIVE BOARD

MIT CEEPR

Deputy Director of MIT's Center for Energy and Environmental Policy Research. His work centres on carbon pricing and markets, border carbon adjustments, international climate governance, comparative policy and the conditions shaping national energy transitions.

Mirjana Drenovak-Ivanović

EXECUTIVE BOARD

University of Belgrade

Professor of Environmental and Climate Change Law and Jean Monnet Chair at the University of Belgrade. Her work focuses on environmental justice, human rights, EU environmental acquis and the development of climate and environmental legislation.

How the Board works

Board members share responsibility for research and publications, annual conferences, thematic working groups, early-career participation, partnerships, communications, finance and administration.

02 / BOARD AND GOVERNANCE

The Board has organised its work around a set of core areas that support the Association's development and its growing community.

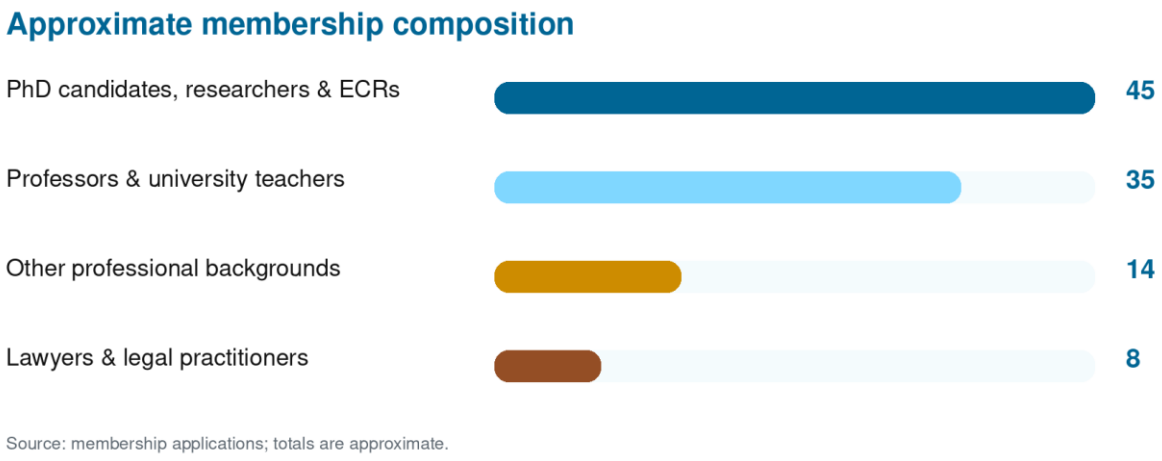
AREA	LEAD
Publications & publishers	Michael Mehling, Michael Kalis
Annual Conferences	Michael Rodi, Jelena Bäumler
Thematic Working Groups	Harro van Asselt, Christina Voigt
Newsletter	Ievgeniia Kopytsia, Michael Mehling
Early Career Researchers	Michael Kalis, Ievgeniia Kopytsia
ECR Award	Michael Kalis, Harro van Asselt
Sponsorship & donations	Ievgeniia Kopytsia, Jelena Bäumler
Cooperation & co-hosted events	Francesco Sindico, Mirjana Drenovak-Ivanovic
Website & social media	Lucila de Almeida, Ievgeniia Kopytsia
Budget & expenses	Michael Kalis, Michael Rodi
Contact with members	Michael Kalis, Michael Rodi

03 / MEMBERS

Introducing the members

The EACL has experienced strong membership growth since its foundation and reached 102 members by 1 September 2026.

Based on the professional information provided in membership applications, the Association connects established scholars, early-career researchers and practitioners working on climate law across Europe.



A BROAD ACADEMIC BASE

The membership profile shows a particularly strong representation of researchers and early-career scholars, alongside university teachers and practitioners.

Starting only in the year 2025, the EACL already expands its regional scope across 20 European countries, based on the affiliation of members provided on their application. Whilst clearly indicating that several perspectives from European countries, institutions and Universities are not yet represented in the EACL, we can already see the association as a European project.

Figure 2: Regional scope of the EACL members, based on affiliations provided at application, Source: @EACL

Membership fees

RESOLUTION OF THE FOUNDING ASSEMBLY

> The EACL levies an annual membership fee of EUR 50 for academics, representatives of non-profit organisations and public-sector employees, and EUR 150 for all other members. The membership fee first falls due upon joining, for the year of accession. No fee is charged in the founding year. The EACL board explicitly discussed but declined options of institutional membership during its founding processes.

CATEGORY	MEMBERS	ANNUAL FEE
Student member	1	€25
Reduced fee (academic affiliation)	95	€50
Full fee	6	€150

04 / EARLY CAREER RESEARCH

Supporting the next generation

Supporting emerging climate law scholars is an important element of EACL's activities.

Climate law does not only include discussion on intergenerational equity and justice; it is to a significant degree driven by ambitious and young scholars. Acknowledging the important role Early-Career Researchers play in shaping Climate Law in Europe and beyond, the EACL put the support of these emerging scholars at its very centre. Next to assigning board members with specific tasks targeted towards the support of and communication with Early Career Researchers and the overall target to provide a platform of exchange and networking across academic career levels, the EACL has established the EACL Early Career Researcher Award, presented in connection with the Annual Conference. The award recognises outstanding research by early-career scholars. It is intended not only to honour individual achievement, but also to strengthen the visibility and integration of emerging researchers within the European climate law community.

Figure 3: Emerging European Climate Law scholar at work, Martje Köppen, Source @EFA

2025 EACL EARLY CAREER RESEARCHER AWARD

Martje Köppen received the inaugural award for “Slipping through the ‘Net’ in Net Zero? The Ambiguous Role of Carbon Dioxide Removal in the European Climate Law.”

Read the award announcement: eacl.eu/eacl-announces-2025-early-career-researcher-award

04 / EARLY CAREER RESEARCH

A platform for participation

Through the award, conferences, publications and working groups, EACL is building multiple routes for early-career researchers to contribute, connect, and be recognised.

The EACL is determined to provide a platform for Early Career Researchers not only via its informal communication networks, but also through dedicated activities and participation pathways. Following this, both the Berlin and Helsinki conference made room for specific sessions for Early Career Researchers. With these sessions dedicated to ECRs and even a specific Call for Abstracts for ECRs in the Berlin Conference, the EACL intentionally gives ECRs the space and time to develop, discuss and present their ideas and research not only among their peers but also among well-established scholars.

Figure 4: A dedicated ECR session at the Berlin conference led by Ievgeniia Kopytsia, Source: @IKEM

05 / ANNUAL CONFERENCES

Berlin 2025: the first gathering

The first EACL Annual Conference, held in Berlin on 22 and 23 September 2025, brought the Association's community together on a larger scale for the first time.

Figure 5. Welcome to Berlin! Welcome to the EACL address by EACL's president, Michael Rodi, Source: @IKEM

Organised with significant support from the Institute for Climate Protection, Energy and Mobility (IKEM), the Conference marked an important milestone: it was both the first major academic event of the newly founded Association and the occasion on which its community met across different areas of climate law.

97

registered participants,

€9,000

conference funding secured

€5,652.50

total income incl. VAT

Following its call for abstracts, the EACL has been overwhelmed by the exciting and unexpected interests of scholars in this network and inaugural conference. With 150+ abstracts received by scholars from different stages of their academic careers, ranging from students and PhD candidates to emerging post-doctoral researchers, distinguished professors and members to official European and United Nations affiliated bodies.

05 / ANNUAL CONFERENCES

Inaugural Conference 2025 in Facts

Figure 6: Getting ready to discuss European Climate Law at the EACL inaugural conference in Berlin, Source: @IKEM

The first day opened with an intensive workshop dedicated to Early Career Researchers, structured around two core thematic sessions.

(1) **Theoretical & Conceptual Foundations** with discussions focusing on the principles of intergenerational justice, its constitutional and international law implications, ethical foundations, ecofeminist perspectives on the role of law in securing a safe climate, and the use of climate fiction to conceptualise future generations legally.

(2) **Practical & Strategic Applications with p**anels covering youth participation, strategic climate litigation, normative bridges connecting current climate targets to intergenerational equity, and perspectives from young scholars on intergenerational climate justice.

The conference established the Annual Conference as a central activity of the Association and created a shared space for researchers and practitioners working across climate law.

For further information on the first EACL conference, please see the conference programme.

05 / ANNUAL CONFERENCES

Keynote Address by Prof. Dr. Christina Voigt

Prof. Dr. Christina Voigt delivered a keynote on *"Law and Governance for Overshoot,"* providing actionable insights into legal frameworks and strategies designed to mitigate climate risks. The keynote was foundational not only to this first day of the conference but also formed the first contribution to the EACL Climate Law Blog.

Figure 7: "Law and Governance for Overshoot" presented by Christina Voigt at the EACL inaugural conference in Berlin, Source: @IKEM

The Berlin 2025 conference was financed exclusively through additional funding secured by the EACL board and conference fees, and closed cost neutral. Thanks to the successful acquisition of additional funding, the EACL board was capable of partly reimbursing the travel and accommodation costs for several Early Career Researchers.

05 / ANNUAL CONFERENCES

Second Annual Conference: Helsinki 2026

17–18 SEPTEMBER 2026

Climate Law 10 Years after the Paris Agreement, hosted by the University of Eastern Finland and its Centre for Climate Change, Energy and Environmental Law (CCEEL).

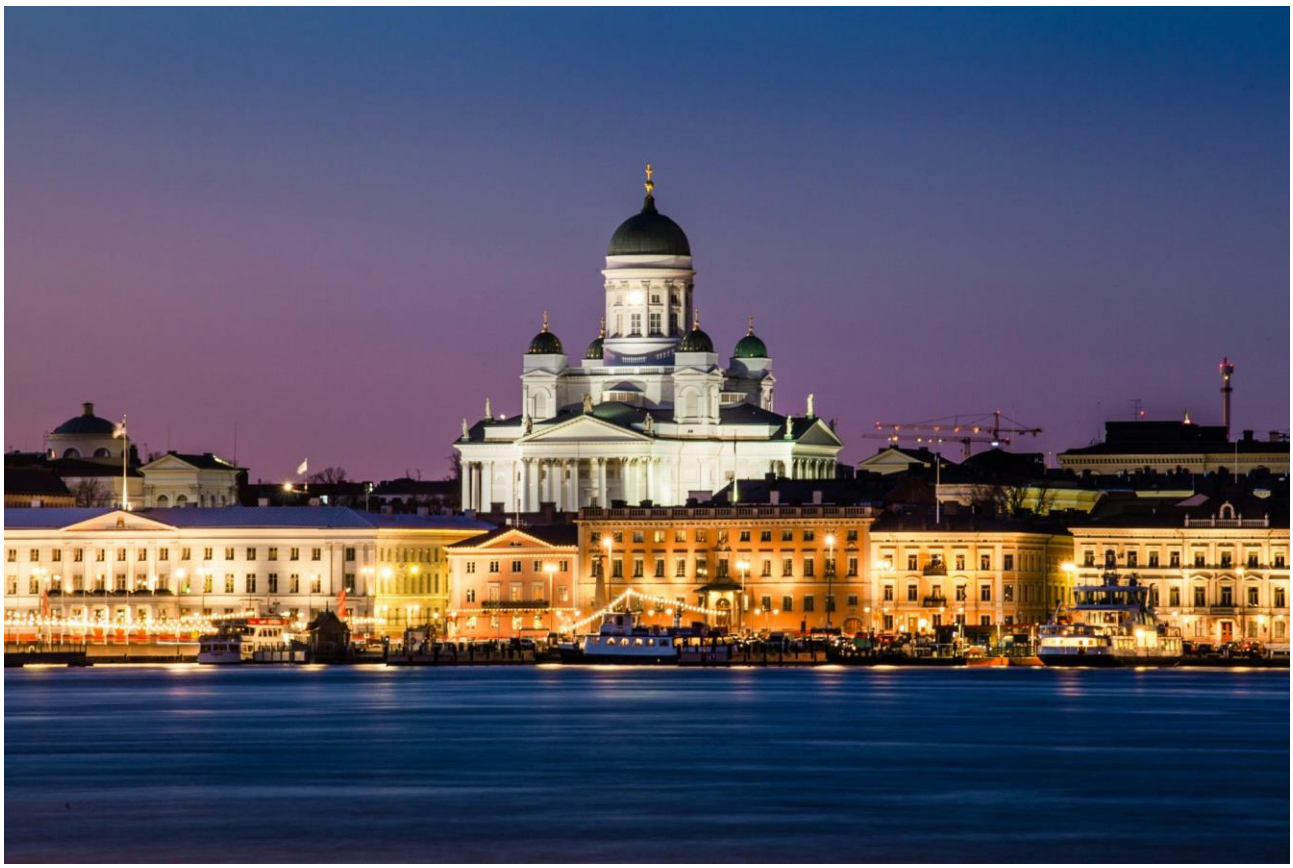


Figure 8: Tervetuloa! The EACL annual conference goes to Helsinki.

The Annual Conference is becoming the Association's central meeting point, linking scholarship, practice and a growing European network.

Establishing an annual gathering was a key commitment to the EACL founding members. Therefore, the EACL board was more than happy to announce already during the inaugural conference that it had come to agreement with the next host of EACL annual conference in 2026.

With the University of Eastern Finland and the Centre for Climate Change, Energy and Environmental Law and spearheaded by Kati Kulovesi, the EACL board put the organisation of the annual conference in more than well-qualified hands.

05 / ANNUAL CONFERENCES

Marking a decade since the Paris Agreement entered into force, the EACL Second conference is gathering international scholars and legal experts to examine the evolution, challenges, and future directions of climate law. The conference features high-level keynote addresses and panel sessions led by prominent voices in international climate law.

Figure 9: Drivers of European Climate Law and the 2nd EACL annual conference, CCEEL, Source: CCEEL

The opening plenary will feature a conversation between Prof. Áine Ryall, Chair of the Aarhus Convention Compliance Committee, and Prof. Elisa Morgera, UN Special Rapporteur on Human Rights and Climate Change.

The 2026 programme advances EACL's core mission by fostering rigorous research across key areas, including EU constitutional climate frameworks, market-based mechanisms, carbon removal technologies, corporate accountability and international court proceedings. The Early Career Researcher Spotlight and Awards will highlight EACL's commitment to mentoring the next generation of climate law scholars.

For further information, please see the conference programme.

During the EACL General Assembly on 17 September 2026, members will review the Association's progress, set priorities for expanding thematic working groups and discuss ways to strengthen EACL's impact across Europe and internationally.

05 / ANNUAL CONFERENCES

Third Annual Conference: Palma de Mallorca 2027

Palma de Mallorca 2027

The University of the Balearic Islands (UIB), the Tarragona Centre for Environmental Law Studies (CEDAT) at Rovira i Virgili University (URV), and the University of Barcelona (UB) are honoured to host the 3rd EACL Annual Conference and welcome all its members and other climate law scholars in Mallorca in Autumn 2027.

Figure 10: The main campus of the University of the Balearic Islands (UIB), Palma, Mallorca. Source: University of the Balearic Islands (UIB).

The EACL board is more than happy to have Gastón Medici-Colombo, from University of Barcelona, Endrius Cocciolo, from the University Rovira i Virgili (CEDAT), and Pau de Vilchez Moragues, from the University of the Balearic Islands, as co-organisers of the Third Annual Conference.

The Conference will be held under the main theme "Climate law in a post 1.5°C world" and is open to contributions from across disciplines and perspectives: from the need to reinforce legal instruments to tackle the climate crisis, to the definition of the legal tools that would enable the indispensable social and economic transitions, as well as the role of the judiciary in shaping all these instruments and, crucially, their implementation, particularly following the decisions and advisory opinions delivered by international and regional courts. All of this within a context of both increasing climate disruption and a drive towards armed conflict.

A call for abstracts with further details will be published in January 2027.

Meanwhile, the EACL board has also begun discussions with a prospective host for the 2028 conference.

Further information on the host and the venues for the 4th annual conference will be announced in 2027.

06 / KNOWLEDGE EXCHANGE

Publications

EACL is developing a connected publication ecosystem: peer-reviewed outputs, member news and timely analysis through the Climate Law Blog.

Journals

Arrangements are under way for the open-access publication of selected Annual Conference contributions in the Carbon & Climate Law Review. The first EACL Special Issue is planned for 2026/27 and will connect research contributions to the themes and discussions of the EACL community.

Acknowledging the need for scientific visibility and following its key purpose of developing European Climate Law, the EACL committed to establishing a recurring and annual publication based upon the annual conferences. With the increasing membership and financial capacities, the EACL was able to follow through on this ambition and to come to agreement with a publisher.

Introducing a special issue with the Carbon and Climate Law Review following the annual conference in Helsinki 2026 and Berlin 2025, the EACL board offers an exciting option for open-access publications for selected participants and contributions to these conferences. With the call for submissions online, the EACL welcomes all EACL members participating or contributing to the first and second conference to submit papers, case studies and other shorter contributions to this first special issue.

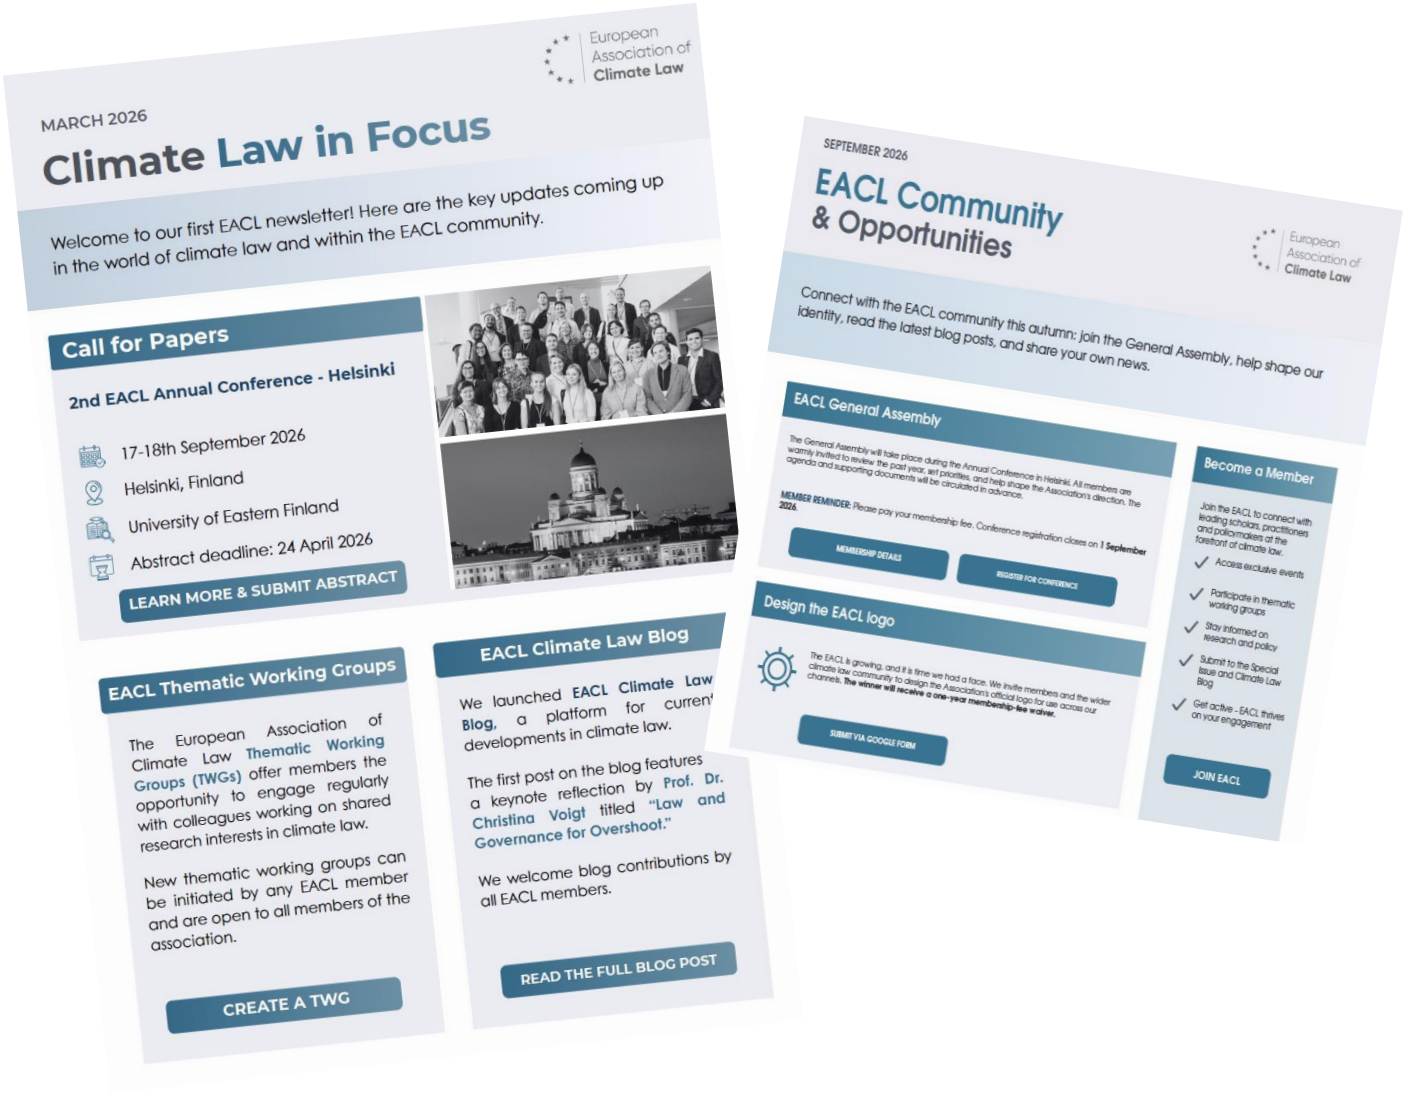
The EACL aims at appropriately representing its community including Early Career Researchers and different jurisdictions, approaches and research perspectives. While assessing the financial capacity on an annual basis, the EACL board is committed to establish this special issue as an annual scholarly publication of EACL bringing together selected research contributions connected to the themes and discussions of the EACL Annual Conference.

The first EACL Special Issue Call: eacl.eu/publications

06 / KNOWLEDGE EXCHANGE

Newsletter

The EACL Newsletter brings together Association news, opportunities, calls and updates for members. Its first editions have also supported membership growth and participation in EACL activities.



Contributions are welcome from EACL members and from the wider climate law community: updates on research, publications, events and projects can all be considered for a future edition.

Send your news: info@eacl.eu

Explore the EACL newsletters: eacl.eu/publications

06 / KNOWLEDGE EXCHANGE

EACL Climate Law Blog

The newly launched EACL Climate Law Blog offers a space for accessible, substantive commentary on developments in European and international climate law, in a form that reaches beyond the academy.

Peer-reviewed publication remains the backbone of legal scholarship, but its rhythm is slow. Judgments, legislative proposals and negotiation outcomes often call for informed commentary within weeks rather than years. The EACL Climate Law Blog was launched in March 2026 to fill that gap: short, substantive analysis by members, written for a readership that includes scholars, practitioners, civil servants and students.

The first year's contributions track the shifting European agenda. *Law and Governance for Overshoot* (18 March 2026) opened the Blog, developed from the keynote Prof. Dr. Christina Voigt delivered in Berlin: there is no longer a scenario in which warming stays below 1.5°C, so the question becomes by how much and for how long the threshold is breached, and what law must do in response. *Carbon Without Borders: Unilateral Trade Measures and the Climate Loophole They Close* (13 June 2026), by Prof. Michael Mehling (MIT Center for Energy and Environmental Policy Research) and Prof. Harro van Asselt (University of Cambridge; University of Eastern Finland), turned to the trade dimension of climate regulation and the gap unilateral measures are designed to close. *After the Green Deal:* Security, Resilience, Strategic Autonomy (26 August 2026), by Prof. Michael Rodi (IKEM; University of Greifswald), asked whether the turn to security displaces European climate policy or extends it. AI, Sustainability, and Climate Targets: A Question of International Law (11 September 2026), by Prof. Francesco Sindico (University of Strathclyde), examined whether states that authorise fossil-fuelled AI data centres in disregard of their climate targets could breach international law.

The Blog is edited by Dr. Ievgeniia Kopytsia with the editorial team and is open to all EACL members. Contributions run to 800–1,500 words including references, across several formats: legal explainers, deep dives, case commentaries, rapid reactions to new developments, voices from practice, symposium contributions and an ECR Spotlight reserved for early-career authors. Members with a case comment, a reaction to a legislative development, or an argument that does not yet warrant an article are encouraged to submit one.

Explore the EACL Climate Law Blog: eacl.eu/blog

If you want to write for the blog, visit: https://www.eacl.eu/blog/submission-guidelines/

07 / COLLABORATION

Thematic Working Groups

Thematic Working Groups are being established to turn shared research interests into sustained collaboration across the EACL community.

The Annual Conference brings the community together once a year. Thematic Working Groups (TWGs) are the Association's answer to what happens in the months between: standing groups of members working on a defined question, at their own pace, across institutions and jurisdictions.

The model is bottom-up by design. Any member may propose one through the form on the Association's website, and proposals are considered by the Board members responsible for this area, Prof. Harro van Asselt and Prof. Christina Voigt. Groups then set their own working methods and their own pace. The Association's role is to convene, to give groups visibility through the Newsletter and the Climate Law Blog, and to make space for them at the Annual Conference.

What comes next

Expanding the working groups is among the priorities members will discuss at the General Assembly in Helsinki on 17 September 2026. Members are welcome to submit proposals at any time or contact the Association if they would like to connect with colleagues working on related questions.
